

Kitten Contract and Health Guarantee

Our Persians will be placed with a contract to protect all involved.

Persians placed in pet / companion homes, are to be spayed / neutered within 6 months of their purchase. Most people sincerely wanting a kitten for a pet will have no problem with a contract.

Breeding rights are only given to responsible breeders. We do not support or encourage "backyard breeding" due to health issues that are contributed to the breed by doing so. You also have no idea the problems that you will encounter in all aspects of raising a litter and you can be easily wiped out - which is a huge financial and emotional loss. Only responsible breeders should be breeding purebreds to preserve, contribute to, and protect the breed.

TNRPERSIANS CATTERY KITTEN CONTRACT

This contract is between Tom and Rita Bybee, hereafter called Breeder

and

_____ hereafter called Buyer

This is to certify that the kitten:

Breed: Persian Sex: _____ Color: _____

Birth date: _____

Sire: _____

Dam: _____

was sold to:

Name: _____

Address: _____

Phone Number: _____

E-mail address: _____

Price or Terms: \$ _____

Deposit \$ 300.00 (nonrefundable/nontransferrable)

Date Received: _____

Balance: \$ _____

Date received: _____

Provisions of Sales Contract

1. Breeder is selling a Persian cat/kitten as a pet registered with CFA.
2. Buyer agrees to have the cat/kitten altered (spayed/neutered) by a licensed veterinarian by the age of 6 months. When Breeder is provided with a copy of the spay/neuter certificate, registration papers will be provided.
3. Buyer will pay the Breeder a nonrefundable deposit agreed upon requesting that a kitten be reserved for Buyer in the amount of \$300. Once a deposit is placed to reserve a kitten, that kitten will not be sold to another buyer. The balance of the full purchase price is to be paid at delivery of the reserved cat/kitten.
4. We do not encourage de-clawing a cat, but in some circumstances it is necessary. Therefore, we encourage the Buyer to only do this only when it is absolutely necessary.

5. Buyer is contracted to provide a lifetime home for this cat/kitten unless he finds it necessary to find a new owner who will act responsibly and can guarantee the cat will be cared for properly.
6. The cat/kitten may not be bred unless certain conditions are met as noted above in the contract.
7. If the Buyer's veterinarian finds, within 3 months of purchase of kitten, the animal has become ill with a life-threatening illness, or the veterinarian finds that kitten will not survive and will die, the Buyer may return the kitten to the breeder and get a full refund of the purchase price of the kitten if Buyer can provide proof of vaccinations, has not allowed the kitten to roam outside, and can provide proof of a life-threatening disease from the veterinarian.
8. The Buyer agrees not to sell, lease, abandon or give this cat to any pet shop, research facility, animal shelter or similar facilities, for either resale or test purposes.
9. Breeder does not recommend using FIP (feline infectious peritonitis) vaccinations. Should the Buyer use these vaccinations on the cat/kitten, the Breeder will NOT refund to the Buyer what the Buyer paid for the kitten should it subsequently develop FIP.
10. Breeder's kittens are all FELV/FIV and PKD negative. These kittens leave Breeder's home in good, healthy condition. In most cases, they will be de-wormed and vaccinated. Should the Buyer merely change his/her mind about purchasing the kitten within 1 day's time of purchasing kitten, wanting to return the kitten, the kitten can be returned, and the Buyer will receive a complete refund minus a \$300 deposit amount. If Buyer merely changes his/her mind over the 1 day's time and wants to return the kitten, and has paid full purchase price, Buyer will receive a 50% refund. No more refund will be given. If Buyer purchases a kitten, and then later Breeder realizes that Breeder made a major mistake in selling said kitten, whether it be because of ill health or gender of kitten, or some other major reason, etc., a full refund will be issued to Buyer, and Buyer may return the kitten (see No. 7 also).
11. If Breeder determines to sell a kitten for whatever reason at a discounted purchase price lower than the original purchase originally stated in the ad, and kitten appears healthy and active, said purchase price does not include health exam, de-worming, or vaccinations as it becomes the responsibility of the Buyer to get this done. Discounting of a kitten does not usually happen unless there is a very important reason to do this, and that reason does not mean the kitten is inferior in any way or of ill health.
12. Kittens are to be picked up at 10 weeks old. If you desire to hold the kitten longer before pickup, breeder charges a \$10 per day hold charge for every day over 10 weeks. However, if breeder requires kitten to be held, this fee does not apply.

Date: _____

- Breeder's Signature: _____
- Buyer's Signature: _____
- All parties signing this contract consider this document to be legally binding.
